'COPYQUEST' DOCUMENT DELIVERY SERVICE

Photocopies or loans of the complete documents referred to in Rapra Abstracts may be ordered using pre-paid vouchers which are available in batches of 20 at the following prices:

UK	£70 + VAT
Overseas	£85
Rapra Members	£55 (+ VAT if paying by cheque in the UK)

(A minimum charge of £10 will be made for individual copies ordered without vouchers).

Documents will be despatched within 48 hours. If you need them faster then fax is available at an additional charge.

Please return to:
Joanne Sadler, Document Delivery Department, Rapra Technology Limited,
Shawbury, Shrewsbury, Shropshire SY4 4NR, United Kingdom.

MICRON & MICROSCOPICA ACTA

The International Journal of Electron Microscopy, Electron Probe Microanalysis, Optical, Computer, and Electron Image Processing, and Associated Equipment and Techniques

Editor-in-Chief: R W HORNE, *School of Biological Sciences, University of East Anglia, Norwich NR4 7TJ, UK*

Micron & Microscopica Acta serves as an interdisciplinary forum for all work which involves the application, practice or theory of transmission and scanning electron microscopy, electron probe microanalysis, electron instrumentation and techniques associated with electron microscopy. The journal also publishes papers and reports on optical and electron image analytical systems, including computer image processing. Papers where optical microscopy and optical systems are closely linked to electron microscopy are acceptable.
The journal is published quarterly in English and embraces original research work in biology, medicine, metallurgy and materials sciences and physical sciences.

New Patents Section — The journal now contains abstracts and illustrations of recently issued United States Patents and published patent applications filed from over 30 countries under the Patent Co-operation Treaty.

POLYMER SCIENCE USSR

A translation of
Vysokomolekulyarnye soyedineniya (series A)

Editor-in-Chief: V A KARGIN
Deputy Editor-in-Chief: P V KOZLOV
Scientific Translation Editor: W COOPER, *Aldridge, Walsall, UK*

Polymer Science USSR features original papers and reviews in polymer chemistry and physics. It is a cover-to-cover translation of the Russian polymer journal *Vysokomolekulyarnye soyedineniya* (series A) and as such, provides information on important research being undertaken in major Soviet Union laboratories.
Some areas covered are:
The preparation and properties of all types of polymers, organic and inorganic, natural and synthetic; studies on the kinetics and mechanisms of polymerizations; the thermodynamics and mechanical properties of high molecular weight compounds; applications and developments of techniques of analysis both chemical and physical; auto-oxidation and chemical modification; visco-elasticity and relaxational properties of polymers.
Polymer Science USSR offers an opportunity for those engaged in polymer research to keep abreast of all major research efforts being made in the USSR through the reading of one journal.
